

# The Sustainability Data Company

GLYNT prepares financial-grade sustainability data on water, waste, energy and emissions for businesses around the world

## Data is the Hardest Challenge in Sustainability

Rounding up and preparing sustainability data takes far too long, putting reporting deadlines and audit schedules at risk. Inconsistent and incomplete data is a constant worry, as new penalties apply. Audit-ready data requires an expensive new system, tying up key resources for months.

## GLYNT is the All-In-One Sustainability Data Solution

GLYNT offers a complete suite of data services for water, waste energy and emissions. A single solution for varied formats and data types. Get customized data for seamless data flows to other business systems. Global coverage

## Get Sustainability Data Prepared as Rigorously as Financial Data

GLYNT prepares accurate, granular, audit-ready sustainability data at SOX quality levels. Frankly, we got audited so you don't have to. Use GLYNT certificates and documentation instead of building expensive in-house systems.

## Work with the Software You Already Use

Leverage your previous investments. GLYNT data flows into sustainability, carbon accounting and business systems.
